PROFILE

AI Engineer and Project Manager with hands-on experience in building end-to-end AI applications, Computer Vision systems, and LLM-powered solutions. Experienced in leading cross-functional teams, managing software projects, and collaborating directly with clients to deliver AI, web, and mobile applications. Passionate about transforming innovative ideas into scalable, real-world products through strong technical expertise and effective project leadership.

EDUCATION

Mansoura University

- Artificial Intelligence Engineering | 2022-2026
- GPA: 3.24 | Early graduation track

TECHNICAL SKILLS

Artificial Intelligence & Machine Learning

- PyTorch (CNN, RNN, GANs) | TensorFlow | Scikit-learn | OpenCV
- LLMs | Prompt Engineering | Retrieval-Augmented Generation (RAG)
- Computer Vision | Face Recognition | Emotion Detection
- NLP: NLTK, SpaCy
- Model Deployment: Flask, FastAPI, Docker, ONNX

Programming Languages

- Python (NumPy, Pandas, Matplotlib)
- Dart (Flutter)
- JavaScript (React, Node.js)
- PHP (Laravel)

Backend Development:

- FastAPI | Laravel | REST APIs | JWT | Postman | Firebase

Data & Databases

- PostgreSQL | MySQL | MongoDB | Firebase Firestore

Tools & Platforms

- Git | GitHub | VS Code | Jupyter Notebooks | Docker | Jira | Odoo | Slack

IoT & Embedded Systems

- Arduino | ESP32 | Sensor Integration | Camera Integration | Serial Communication

PROJECTS

EDUvision – AI-Powered Smart Education Platform | GitHub
• Built a cloud-based AI learning platform featuring SEBA, an intelligent tutoring assistant.
• Implemented a RAG pipeline using LLMs for personalized, curriculum-aware educational responses.
• Developed Computer Vision pipelines for Face Recognition, Emotion Detection, and Attention Monitoring.
• Integrated ESP32, RFID and Camera hardware for automated attendance and smart classroom management.
• Designed Flutter frontend with Firebase services and RESTful APIs for seamless user experience.
• Coordinated project architecture, Agile development, and cross-functional team collaboration.
• Delivered a responsive React interface with full RTL support for accessibility.

Hatheq - ADHD Detection System | GitHub
• Developed a real-time Computer Vision system to analyze user attention and eye-gaze behavior for early ADHD-related attention pattern assessment.
• Processed live camera streams to detect facial landmarks, extract eye-region features, estimate gaze direction, and infer attention levels.
• Built an integrated frontend and backend application for real-time monitoring and visualization.
• Optimized the system for accurate and efficient real-time performance.
• Achieved 94% accuracy using transformer architecture
• Implemented Docker containers for scalable deployment

Smart Environment | Hackathon (3rd Place)
• Built IoT system with C-programmed sensors and Python data pipeline
• Created real-time dashboard using React and Plotly

EXPERIENCE

Project Manager
AAIT (Awamer Alshabaka) | [07/2026] – Present
• Manage multiple software projects for clients across diverse industries, ensuring timely delivery and alignment with business requirements.
• Coordinate communication among clients, developers, designers, and QA teams throughout the project lifecycle.
• Gather and analyze client requirements, translate them into actionable tasks, and monitor project progress.
• Utilize the company's internal project management platform to plan, assign, and track tasks.
• Work with Odoo to manage business workflows and support project operations.
• Collaborate with cross-functional teams via Slack to ensure effective communication and efficient issue resolution.

• Monitor project timelines, priorities, and deliverables while maintaining high levels of client satisfaction.

Backend Developer Trainee
Tailors Dev Company | [07/2025] - [09/2025]
• Developed RESTful APIs using PHP/Laravel for e-commerce applications
• Implemented MySQL database optimization techniques improving query performance by 30%
• Collaborated in Agile teams using Git version control
• Gained production-level experience in: - Payment gateway integration - JWT authentication - MVC architecture

Quality Control Tester Trainee
Tailors Dev Company | [09/2025] - [10/2025]
• Executed 50+ test cases for web applications (Manual + Selenium)
• Reported 120+ bugs with detailed reproduction steps in JIRA
• Automated regression tests (Python + pytest) saving 15 hrs./week

Techno Kids Programming Instructor
Mansoura University | [07/2023] - [08/2024]
• Developed and delivered a Python curriculum with hands-on AI and ML projects.
• Mentored 50+ students in building their first AI models

CERTIFICATIONS

Microsoft – Front-End Development (2026) | Credential URL
Huawei HCIA-AI (2025) | Credential URL
ITI with Connectors Team (2023) | Credential URL
• Advanced Python Programming
